DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 6-7, 11-12 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Schulte (4,944,685).

Regarding claims 1, 6, 11 and 15, Schulte, figures 1 and 2, discloses a cover for an electrical plug (20), comprising:

- a resilient sleeve (10A) having a front, a back and surrounding an interior adapted to receive a plug (20); and
- a slit and a second slits (14);

wherein force applied in a plane perpendicular to the slit causes the sleeve to attain a bowed state, thereby providing access to the interior through the first and the second slits.

Regarding claims 2, 7 and 12, the resilient sleeve is integrally formed from a single piece of resilient material.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3, 8 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schulte (4,944,685).

Schulte discloses the instant claimed invention as described above except for the resilient material is rubber.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Schulte to have the sleeve is made from rubber, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use. In re Leshin, 125 USPQ 416, in order to reduce cost.

Allowable Subject Matter

5. Claims 4-5, 9-10, 14 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is an examiner's statement of reasons for allowance:

None of the reference discloses the cover including a tab disposed upon a top and a tab disposed upon a bottom of the resilient sleeve (claims 4, 9 and 14) and a

dividing member longitudinally disposed along the interior of the sleeve (claims 5, 10 and 16), in combination with the other claimed elements of the embodiments recited.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
